How to Make a Rain Gauge:

(go to <http://www.escapadedirect.com/raingauge.html> for complete, detailed directions)

Step 1: Rinse a clear 2-liter plastic bottle.

Step 2: Cut the bottle where the top begins to taper to form a funnel for the rain gauge.

Step 3: Place the top of the bottle upside down into the plastic bottle. Mark a scale on the bottle with a permanent marker. Set the rain gauge in a clear area outside, and wait for rain!

Helping children think... outside the box.™
